ABOUT THE CONFERENCE

This will be the **eleventh Conference** in a series of conferences held in Ispra, Italy - 2000, Reims, France - 2002, Lausanne, Switzerland - 2004, Brussels, Belgium - 2006, Nürtingen, Germany - 2008, Reims, France - 2010, Helsinki, Finland - 2012, Timișoara, Romania - 2014, Leuven, Belgium - 2016, and Prague, Czech Republic - 2018.

This conference has become a regular event among technical meetings for engineers and scientists working in the fields of water determination, water activity and water interactions with biological molecules.

The most important studies presented at this conference may be submitted for publication in a special issue of the journal *Food Chemistry* (ISI 9.3).

OBJECTIVES

This 11th Conference intends to focus on water in food and its biological interactions. It will cover the progress in the fields of water determination, water activity and water interactions in the food matrix as well as the influence of water on food processing and stability.

Presentations should illustrate the importance of these items including water mobility to food formulation and preservation. Special aspects of water for food quality will also be addressed.

TOPICS

- Water structure and interactions in food and biological systems*
- Water activity and the shelf life of food products*
- Water analysis and identification of food*
